

Is your child between 3-8 years of age?

Is he/she diagnosed with autism disorder?

If yes,
McGill University's Resilience, Paediatric Psychology, and Neurogenetic Connections research team is looking for families with children diagnosed with autism disorder (3-8 years of age).

Our goal is to help understand the nature of language disorder and nonverbal communication in children with autism.

Your participation can be completed from the comfort of your own home and involves filling out questionnaires and engaging in play activities with your child. Parents receive compensation and kids receive prizes!!!
